

# SWE312: Software Construction & User Interfaces

## Lab 5

### JavaFX Shapes

- Due date: **Monday 11<sup>th</sup>, of November 2024.**
  - Work INDIVIDUALLY. No group work is accepted.
  - Stick to deadlines! Late assignments will not be accepted.
  - Submit your solution to the LMS system, do not send it by email.
- 

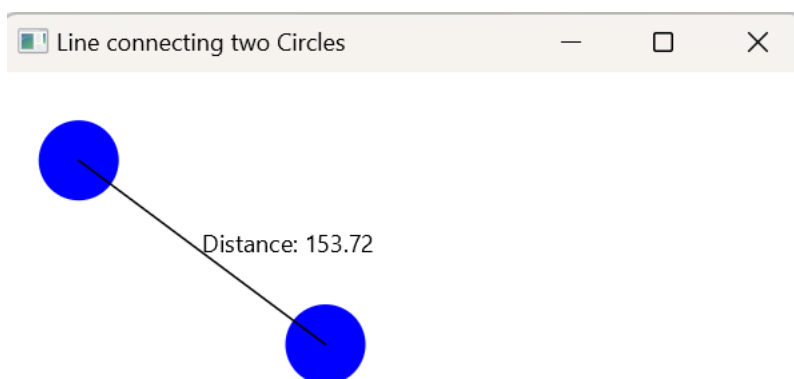

**Q1:** Write a JavaFX program that draws two filled circles with radius 20 pixels, centered at random locations, with a line connecting the two circles. The distance between the two centers is displayed on the line.

To calculate the distance between two points, use the formula below:

### Distance Formula

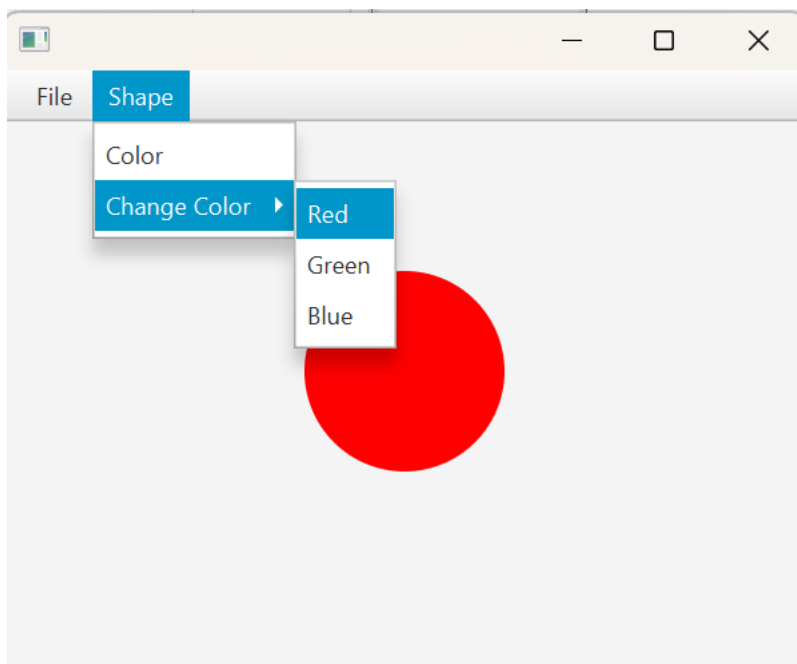

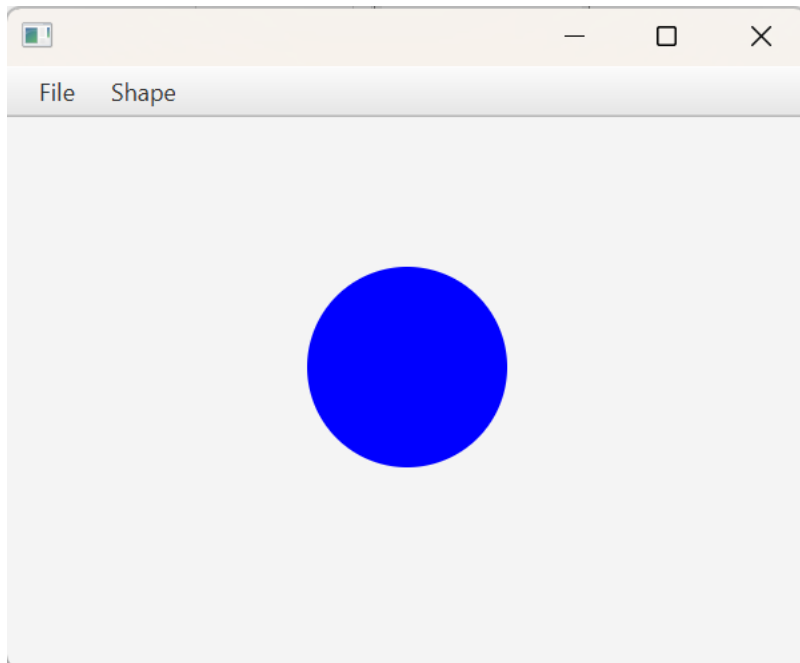

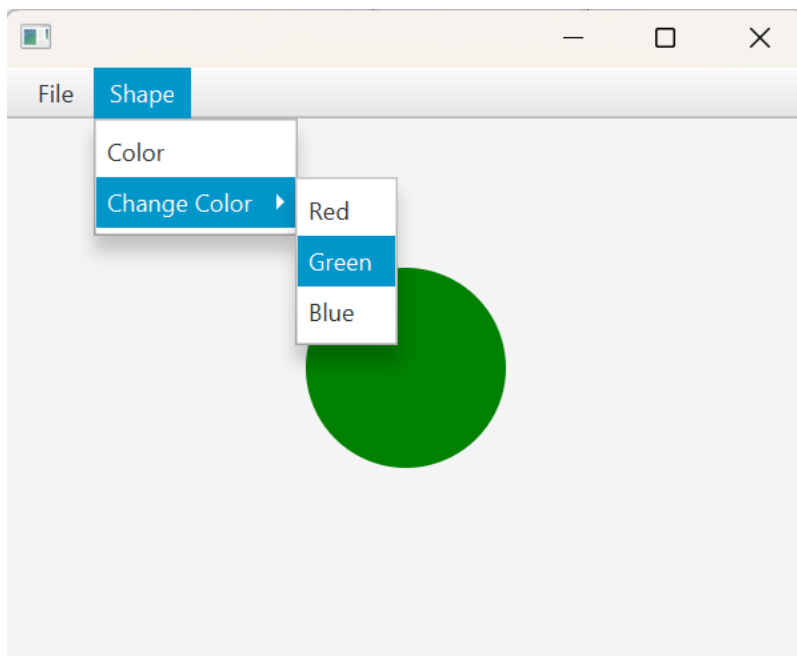

### Sample Run:

**Q2:** Create JavaFX menu which allows the user to change the color of the circle and to exit if the user clicks **Exit**.

**Sample Run:**

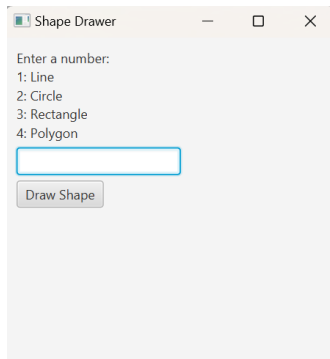

**Q3:** Create a simple JavaFX GUI application where the user can enter a number (1 to 4) to draw different shapes on the screen. Here's a summary in three lines:

1. The user is prompted to enter a number (1: Line, 2: Circle, 3: Rectangle, 4: Polygon).
2. Based on the entered number, the corresponding shape is drawn on the screen in specific colors and sizes.
3. The GUI includes a button to trigger the shape drawing, with feedback for invalid input.

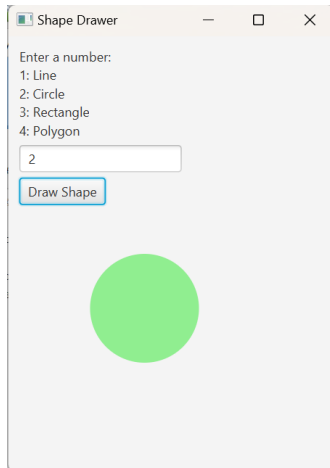

## Sample Run:

Shape Drawer

Enter a number:

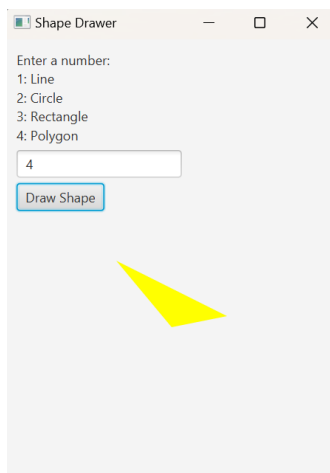

- 1: Line
- 2: Circle
- 3: Rectangle
- 4: Polygon

Shape Drawer

Enter a number:

- 1: Line
- 2: Circle
- 3: Rectangle
- 4: Polygon

Shape Drawer

Enter a number:

- 1: Line
- 2: Circle
- 3: Rectangle
- 4: Polygon
